

Universal Gateway

Product Datasheet

The Universal Gateway is capable of supporting any analogue emergency telephone in place of a PSTN landline.

This system is ideal for those seeking to:

- Install an EN81-28 compliant emergency telephone system
- Upgrade any existing phone system from PSTN to GSM

Telephone numbers can be programmed directly into the Universal Gateway, removing the need to program each connected lift telephone.

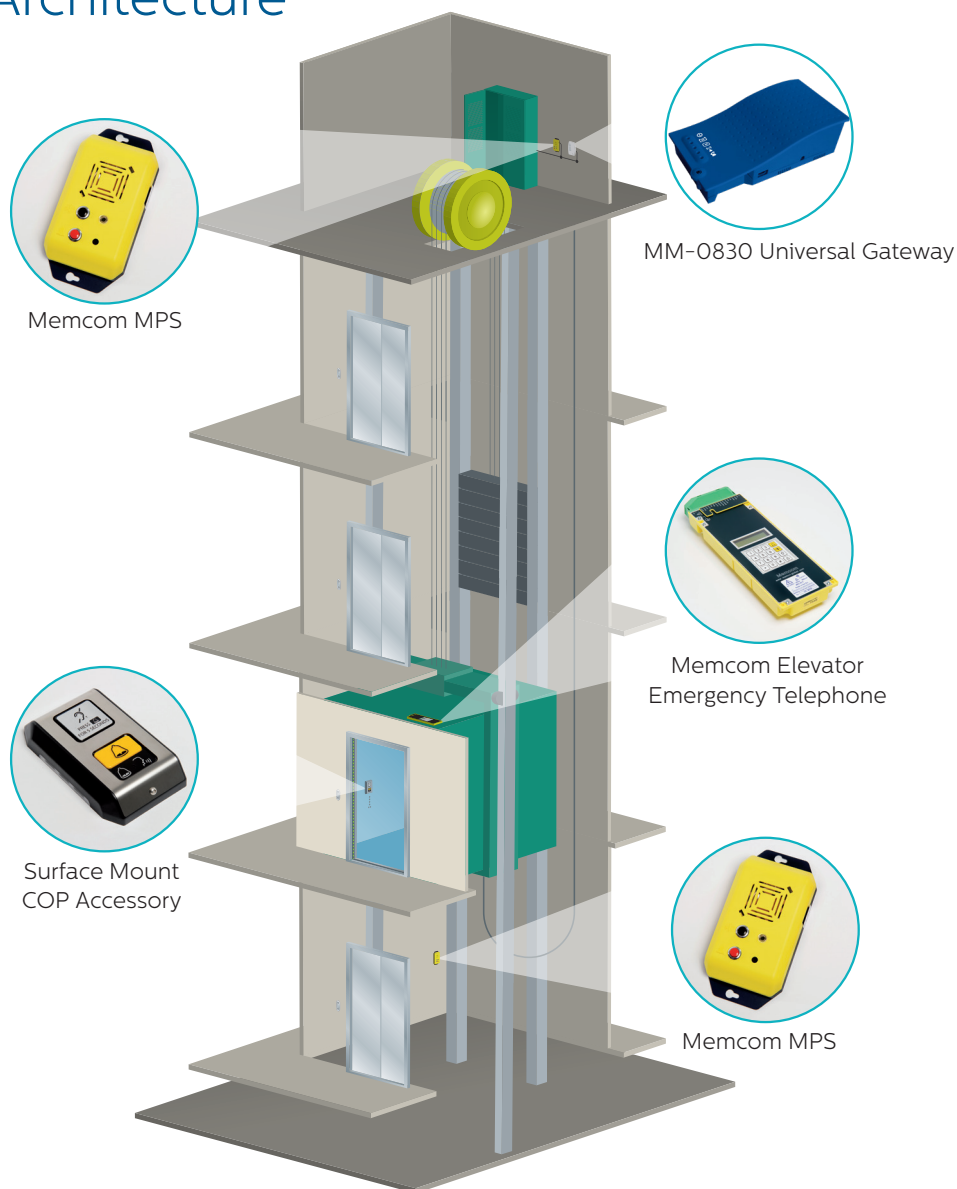

The Universal Gateway is also capable of receiving firmware updates remotely, minimising the need to revisit site once the product has been installed.

The Universal Gateway works with the full range of Memco telephone products and antenna accessories.
